If you are a Mac user or did not install the Anti-RSI software, then the light indicates the dots per inch (DPI) resolution setting.. If you experience problems, please consult a doctor Protection for your joints Sculpt Ergonomic Keyboard is built on advanced ergonomic principles, with a split keyboard layout that keeps wrists and forearms in a relaxed position, and a cushioned palm rest that protects against inflammation and repetitive stress injuries.

It does so by forcing you to take regular breaks, yet without getting in the way.. * Break windows appear on all connected displays * Larger break window, screens are no longer 17 inch.. Usually I set it at 3 minutes once an hour, but when I have a particularly tedious task, I'll shorten it to avoid glazing over.. It also detects natural breaks so it won't force too many breaks on you -------------------------------- ADDS MANY REQUESTED FEATURES--------------------------------This is an evolved version from the still free 2.. (Feedback appreciated)------------ PLEASE NOTE------------AntiRSI is a reminder tool that can be helpful, but it is not a medical device.
